## PROFILE

Enthusiastic web developer with expertise in React, Next.js, and the MERN stack. Committed to continuous learning and experimentation with emerging technologies. Currently engaged in projects integrating AI with modern web solutions. Seeking opportunities to contribute to impactful products while advancing technical skills.

## SKILLS

**Languages** — JavaScript, TypeScript

**Frameworks/Libraries** — React.js, Next.js, Node.js, Express.js

**Styling** — Tailwind CSS, Chakra UI

**Database** — MongoDB

**Tools & Platforms** — Git, GitHub, Vercel, Render

**Other** — REST APIs, Responsive Design, Debugging, Local Storage, Time management, adaptability

## PROFESSIONAL EXPERIENCE

### Krisol Infosoft Pvt. Ltd

Oct 2024 – Apr 2025

Junior Web Developer Intern

Mumbai, India

- Developed and deployed Management Information System (MIS) and ERP for Comart, optimizing production workflows.
- Enhanced user interface and responsiveness for Krisol's corporate website to improve user experience.
- Contributed to frontend development for Marinex and BMC Chef Booking Platform, emphasizing component reusability.
- Gained practical experience in debugging, deployment, and various frameworks.

---

## EDUCATION

---

### Patkar Varde College

Bachelor of Science, Computer Science

CGPA: 8.93

Jun 2021 – Apr 2024

Mumbai, India

---

## PROJECTS

---

### Anime Watchlist Web App [↗](#)

React.js, TypeScript, MERN

- Features include search, watchlist management, and CRUD operations on anime entries
- Integrated the Jikan API for enriched anime metadata, episode information, and graphics
- Implemented a responsive design with dark mode and local storage capabilities
- **Live:** <https://personal-anime-watchlist-frontend.onrender.com/> [↗](#)
- **GitHub:** <https://github.com/5Rashmi/Personal-Anime-Watchlist> [↗](#)

### Web Portfolio [↗](#)

Next.js, TypeScript, MongoDB, Express.js

- Created a desktop-style portfolio featuring widgets and a customizable interface
- Incorporated third-party APIs for real-time data, such as weather, music, and search results
- Implemented a suggestion form with back-end support for data persistence
- **Live:** <https://my-web-portfolio-one-peach.vercel.app/> [↗](#)
- **GitHub:** <https://github.com/5Rashmi/my-web-portfolio> [↗](#)

### JavaScript Mini Projects [↗](#)

Vanilla JS

- Developed some interactive tools, enhancing my skills in DOM manipulation and dynamic UI design
- **GitHub:** <https://github.com/5Rashmi/JavascriptMiniPrograms> [↗](#)

### Academic Projects

- **Shadows of Starhaven:** Developed a 3D game using Unity and C# featuring enemy AI and player interactions
- **ArtHub Connect:** Built an Android app in Kotlin and Firebase for community engagement, where artists can post their artwork with features like login, like, comments, and live chat
